* Land use classifications vary slightly between data sources.

ABOUT THIS MAP

Data Sources: The land use / land cover categories displayed on this map were derived from sources that included the U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service's (ASCS) low altitude, section-centered, 35mm color aerial photography taken during 1988-1990 and U.S. Fish and Wildlife Service National Wetlands Inventory (NWI) 1:24,000-scale field maps. Landsat satellite images (date unrecorded) were used to verify the classifications.

Data Interpretation and Computerization: The project was coordinated by The International Coalition for Land and Water Stewardship in the Red River Basin. Land use / land cover interpretation was performed by DPA International. The smallest area interpreted was approximately 2.5 acres.

Land use / land cover information was transcribed on to stable-base mylars registered to U.S. Geological Survey 1:24,000-scale topographic maps and then digitized by DPA International or Alexandria Technical College staff. Minnesota Department of Natural Resources MIS Bureau staff then joined the digitized files together to create county

On-line documentation: http://lucy.lmic.state.mn.us/metadata/luse89.html

The following groups also participated over an extended period:
Alexandria Technical College - GIS Program
DPA International The International Coalition
Minnesota Board of Water and Soil Resources Minnesota Department of Natural Resources Minnesota Land Management Information Center North Dakota State University - Agricultural Engineering Department The Red River Management Board University of Minnesota - Department of Forest Resources

Map Projection: UTM, Extended Zone 15 Datum: NAD83

University of North Dakota - Geography Department
